

High-Quality Wear Components

CUSTOM DESIGNED PRODUCTS

We manufacture an extensive line of high-quality replacement parts for bottle filling machinery. Our strong commitment to research has resulted in the development of 100s of new products.

Many Uni-Spray bottling components are custom designed and manufactured to specific customer requirements. In every possible case these products have been designed to outperform OEM replacements, often at significant cost saving.

We offer complete consulting and design engineering services, ranging from conceptual design to CAD design, 3D solid models and rapid prototyping services. We have the ability to build low cost prototype molds and inserts to assist in testing designs prior to full-scale production.

OUR APPROACH

Uni-Spray's manufacturing process is virtually self-contained. As a result we maintain a high degree of control over design and cost factors from start to finish. You, in turn, enjoy the benefits of competitive pricing and the fastest delivery schedule in the industry.

The following characteristics are why knowledgeable customers choose Uni-Spray products:

- Superior and consistent quality
- Complete solutions
- Quick turn-around

You can rely on Uni-Spray's worldwide, just-in-time programs to reduce your inventory levels. Our large inventory of components is ever-evolving. If we do not stock the specific product you need, please do not hesitate to contact our design team to discuss manufacturing a part to your specific needs.

If your project or requirement is time sensitive, please contact Damen Toushan:
